Negative > Positive

A business card is a necessary accompaniment at any event where 'networking' is likely to happen. A person will be remembered for longer if a business card is accepted.

A critical opinion suggests that I would have achieved a more memorable impression if the words had read, 'Enthusiasm **NOT** Greed, Desire **NOT** Fear, Gratitude **NOT** Envy.'

My defence is that it is for each person to decide what meaning they will attribute to each word and then consider whether the context in which it is being used is either positive or negative.
